PROFESSIONAL SUMMARY

Senior Flutter Developer with 4 years of experience architecting and delivering production-grade cross-platform mobile applications for Android and iOS across ride-hailing, food delivery, marketplace, e-learning, fintech, and e-commerce domains. Deep expertise in Flutter, Dart, Kotlin, Clean Architecture, MVVM, Riverpod, and Bloc, combined with strong hands-on experience in real-time systems (Socket.IO, WebRTC), live GPS tracking, video streaming, offline-first design, and payment gateway integrations. Proven track record of leading end-to-end mobile product delivery — from architecture design and API collaboration through CI/CD automation and App Store / Play Store releases. Adept at collaborating with distributed, cross-functional teams and consistently delivering scalable, performant, and maintainable mobile applications.

CORE COMPETENCIES

Mobile Development: Flutter, Dart, Kotlin, Java, Android SDK, iOS Deployment

Architecture & Patterns: Clean Architecture, MVVM, Repository Pattern, Modular Architecture

State Management: Riverpod, Bloc/Cubit, Provider, GetX

Real-Time & Streaming: Socket.IO, WebRTC, Live GPS Tracking, Video Streaming, Offline Playback

Backend Integration: REST APIs, Firebase (Auth, Firestore, FCM, Analytics, Crashlytics)

Data & Storage: Hive, SharedPreferences, WorkManager, Offline-First Architecture

Maps & Location: Google Maps SDK, Google Places API, Geolocation, Route Visualization

Payments & Notifications: Khalti Payment Gateway, Firebase Cloud Messaging (FCM), Push Notifications

DevOps & Tooling: Git, GitHub Actions, CI/CD Pipelines, Fastlane, App Store / Play Store Releases

Project Management: Agile, Scrum, Jira, ClickUp

PROFESSIONAL EXPERIENCE

Senior Mobile Application Developer | Janak Tech Pvt. Ltd. Jan 2026 – Present | Kathmandu, Nepal

- Architected and led development of marketplace, ride-hailing, and food delivery Flutter applications for Android and iOS.
- Engineered real-time ride request dispatching, live order tracking, and driver location synchronization using Socket.IO, reducing latency and improving dispatch accuracy.
- Integrated WebRTC-based in-app voice communication, enabling seamless driver-passenger coordination without third-party calling costs.
- Designed and implemented live GPS tracking and route visualization using Google Maps SDK, supporting multi-stop delivery workflows.
- Established Clean Architecture and modular project structures, improving codebase maintainability and onboarding speed.
- Collaborated with backend engineers to define REST API contracts and socket event schemas, accelerating integration cycles.
- Managed Play Store and App Store release pipelines including versioning, staged rollouts, and compliance reviews.

Technologies: Flutter, Dart, Riverpod, Socket.IO, WebRTC, Firebase, Google Maps SDK, REST APIs, CI/CD

Mobile Application Developer | eVidhya Jan 2025 – Dec 2025

- Built a cross-platform e-learning application with adaptive video streaming, enabling high-quality content delivery on variable network conditions.
- Implemented offline learning capabilities using WorkManager for background media downloads and Hive for local content storage, increasing course completion rates for low-connectivity users.
- Integrated Firebase Cloud Messaging (FCM) for personalized push notifications, driving a measurable increase in daily active learner engagement.
- Leveraged Firebase Analytics and Crashlytics to monitor user behavior and application stability, resolving critical crashes proactively before public releases.

- Published and maintained Android and iOS application releases with consistent delivery across sprint cycles.

Technologies: Flutter, Dart, Hive, WorkManager, Firebase (FCM, Analytics, Crashlytics), Video Streaming

Mobile Application Developer | SobizTrend Oct 2023 – Dec 2024

- Developed and maintained a suite of Flutter applications across e-commerce, agritech, news, and events verticals, delivering consistent UI/UX across platforms.
- Integrated Khalti Payment Gateway into marketplace and e-commerce applications, enabling secure and localized digital transactions.
- Implemented real-time messaging and location-based feature sets, improving user engagement within marketplace and events applications.
- Optimized application rendering performance and reduced cold start times through lazy loading, widget tree restructuring, and build caching improvements.

Key Projects: Smart Dai, KrishiGyan, Sobij Marketplace, Sobij Events, Online Nepal

Technologies: Flutter, Dart, Khalti Payment Gateway, Firebase, REST APIs, Google Maps SDK

Mobile Application Developer | Ideapreneur Nepal Nov 2022 – Oct 2023

- Developed fintech mobile applications for investment tracking, expense management, and stock market dashboards, serving individual and institutional users.
- Built financial analytics modules with real-time market data visualization, supporting data-driven investment decisions for end users.
- Implemented Firebase Analytics, Crashlytics, and push notification pipelines to ensure high application reliability and proactive issue resolution.

Technologies: Flutter, Dart, Firebase, REST APIs, Financial APIs, Bloc

Mobile Application Developer | VJ Consulting Jun 2022 – Nov 2022

- Developed Android mobile application features for a ride-sharing platform using Kotlin, including Google Maps and Google Places API integration for location-aware ride matching.
- Delivered core booking, driver tracking, and fare estimation features within a fast-paced startup environment.

Technologies: Kotlin, Java, Google Maps SDK, Google Places API, REST APIs

Android Developer | ApplyJob.com Nov 2021 – Jun 2022

- Maintained and enhanced a job portal Android application, integrating Firebase Cloud Messaging (FCM) for real-time job alert notifications and improving user retention.
- Delivered iterative API integration improvements, enhancing job search and application submission workflows.

Android Developer | Utech IT Professionals Jun 2021 – Aug 2021

- Developed Android applications using Java and Kotlin with MVVM architecture, REST API integration, and local data storage solutions.

FEATURED PROJECTS

Himal Ride — Multi-service ride-sharing and food delivery platform with real-time GPS tracking, Socket.IO-powered dispatch, live order tracking, and secure in-app communication.

Himal Driver — Driver application for ride-sharing and food delivery with real-time trip management, live GPS navigation, Socket.IO-powered dispatch, earnings tracking, and instant ride/order updates.

Safe Ride — Real-time ride-hailing application with live GPS tracking, Socket.IO-powered dispatch.

Zstro AI — AI-integrated mobile application combining intelligent search with a Flutter-based cross-platform interface.

Chalk Duster — E-learning platform with adaptive video streaming, offline playback, and background content download capabilities.

MoneyMitra — Fintech application providing investment tracking, stock market dashboards, and personal expense analytics.

KrishiGyan — Agritech application.

EDUCATION

Bachelor of Science in Computer Science and Information Technology (BSc. CSIT)

Vedas College, Lalitpur, Nepal | 2015 – 2020

LANGUAGES

Nepali (Native) | English (Intermediate)
